M.S. Software Engineering

San Jose State University
2007-2009

Developing Cloud Applications
with Node.js and React by IBM
Issued May 2021

Introduction to Cloud
Development with HTML, CSS,
and JavaScript by IBM
Issued March 2021

Experience

Freelance Web Developer

Gabriel Coke Art Studio (gabrielcoke.com)

- Designed and developed Art Students' Atelier for Gabriel Coke
- Delivered enhancements within tight deadlines
- Developed custom shopify themes using Liquid & Javascript

Sr. QA Engineer, Developer

2015 - Feb 2021

- Fixed critical production bugs as a developer (Angular, Java)
- Collaborated with product management to prioritize and implement bug fixes
- Provided guidance to developers, product managers, and support for quick turnaround of customer issues.

Software QA

2013-2015

- Extended and maintained iOS and Android test apps to support SDK releases. This SDK currently has 3 million users.
- Developed automated regression suite for Facebook social plugins.
- Supported testing team by investigating and triaging bugs.

Personal Projects

Naturalz Skin Care Solution

eCommerce Website using React.js, Redux and Firebase

<https://naturalz-live.herokuapp.com/>

Key features include:

- User authentication and signup using Firebase
- Storage using Firestore
- Shopping cart functionality
- Credit card payments using Stripe

Cute Kittens

<https://harshadajog.github.io/cute-kittens/>

This fun app was used to play with Javascript Fetch API, React state and props. It also has a small search functionality.
